

RECTANGLE 3 DIGITS DISPLAY DINFER ELECTRONICS

1. Product description

The "3-Digit Rectangular Visor" unit has been designed for use in beer columns and handles as a sample element for refrigerated liquid temperature. It is normally mounted on beer columns.

The internal software of the unit recreates a sequence of temperatures that simulates a lowering and a cyclical temperature rise; As the unit does not have its own temperature probe or communications to the thermostat, making it very easy to connect.

2. Technical specifications

Electrical Characteristics

- Feeding tension:	5VDC
- Absorbed power:	75mW MAX
- Display:	7 segments / 3 digits
- Display Color:	Briliant Red
- Light intensity display:	22 mcd
- Cyclic temperature range:	-2,0C a -1,0C
- Operating temperature:	-20C a 70C
- Connections:	1 Polarized pole connector
