

ENVIRONMENT AND QUALITY POLICY

With an important corporate career for over 25 years, **DINFER ELECTRÓNICA** provides its customers with electronic controls which deserve the maximum trust, working as a real professional team deeply implicated in quality, the environmental respect and the customer service.

DINFER has as main target to reach a leading position in Spanish market about design, manufacturing, marketing and after-sales service in electronic controls, promoting a higher presence in international market in a progressive way.

Our commitment with quality is based in these foundations:

1. Assure the satisfaction of our customers referring to compliance of legal and other requests.
2. Increase and consolidate innovation in a surround of continuous improvement.
3. Keep our position of national leadership.
4. Have the necessary flexibility to adapt our firm to the customer's requests, in a volatile and competitive world.
5. Count on the participation of motivated employees, with a enough training, in order to get an improvement of products and processes.

Our commitment with environment is supported in several principles:

- + Prevent pollution and save natural resources through application of organization and technological steps that can be suitable and viable.
- + Operate always under a strict compliance of current legality, and respect the agreements or request from customers.

Through both policies, in **DINFER ELECTRÓNICA** we pretend to get two main aspects for our development as a great company: the satisfaction of our customers and the continuous improvement.

That is why we have introduced a system of management of quality and environment under ISO 9001:2015 and 14001:2015 rules
